

JCB HM140

FEATURES

- JCB breakers feature outstanding impact energy and compact construction for class-leading power-to-weight performance.
- Sealed for life accumulator means the accumulator only needs recharging upon a full rebuild service, reducing maintenance costs.
- Stainless steel piston eliminates corrosion and offers greater protection to the seals.

APPLICATION

- Quarry - Secondary breaking
- Pipe & cable laying - Trenching
- Road & realty sector - Foundation work & demolition

TECHNICAL PARAMETERS

- Operating weight : 235 kg
- Impact energy : 294 J
- Blow rate : 600~1500 Bpm
- Oil flow range : 23~70 lpm
- Tool diameter : 57 mm
- Carrier weight : 1.5~4 tonne
