

JCB VIBRATORY ROLLER

FEATURES

- Simple plug and play operation.
- Effective compaction of slopes and tricky terrain with high productivity.
- Useful for compaction areas accessible to conventional compaction methods.
- Can work in wet and slippery areas where conventional compactors are not suitable.
- Self cleaning drum.
- Maintenance free design and easy access to replace vibration damping pads.

APPLICATION

- Irrigation canal, road, railways trench, embankment, water sewage.

TECHNICAL PARAMETERS

Part No.	:	401/K8499
Drum weight	:	417 kg
Drum width	:	800 mm
Drum diameter	:	580 mm
Drum thickness	:	12 mm
Vibration motor	:	Yes
Centrifugal force	:	19.1 KN
Frequency	:	47 Hz
Motor	:	8.4 CC
Max flow	:	25 LPM
Max pressure	:	175 BAR
